

2nd Electrician - Voyager

POSITION SUMMARY / ESSENTIAL FUNCTIONS

The Second Electrician is responsible for supporting the maintenance of all electrical equipment and systems as directed by the Chief Electrical Engineer to ensure safe operation, environmental protection and passenger comfort.

- Responsible for the maintenance and repair of any electrical systems onboard as directed by the Chief Electrical Engineer.
- Must have a good knowledge of the electrical equipment in the hotel and galley areas.
- Responsible for reporting any concerns with the electrical systems to the Chief Electrical Engineer.
- Must have initiative, be proficient in electrical trouble shooting, solve electrical problems and work independently.
- Must know the location of all the major distribution panels, in order to be able to shut down power in the event of any failures, fire or maintenance work.
- The Second Electrician must be familiar with safety routines and ensure that the necessary safeguards are in place before any maintenance/repair work commences.
- Awareness of Class Rules and industry standards and the implications of any modifications to electrical systems.
- Must be familiar with the Safety Management System including his/her responsibilities in the Safety Organization according to the emergency Plan and Station Bill.
- Performs other related duties as assigned or as directed. The omission of specific duties does not preclude the supervisor from assigning duties that are logically related to the position.
- Must be familiar with the Safety and Environmental Protection Policy and the SEMS, and carry out the policies and procedures appropriate for his/her position.

QUALIFICATIONS / REQUIREMENTS

- Minimum of two years prior experience repairing and maintaining electrical equipment and systems onboard a vessel or in a similar industry is required.
